

Who We Are

The Montana Renewable Energy Association (MREA) was established in December 2000 as a nonprofit corporation to support the development of renewable energy in Montana.

MREA's activities include:

- ❖ Expanding the use of renewable energy technologies such as solar, wind, small hydro, geothermal and biomass energy;
- ❖ Affecting public policy in favor of renewable energy;
- ❖ Educating and informing residents of Montana about the benefits and uses of renewable energy.

Benefits to member:

- ❖ Participating with a dedicated group to promote and expand the renewable energy marketplace in Montana.
- ❖ Having a new, focused voice affecting public opinion and policy toward the expanded use of renewable energy, uncomplicated by group agendas other than renewable energy.
- ❖ Educating Montanans about the benefits of renewable energy, including economic development, conservation of natural resources, and improving the environment.

Companies dealing in renewable energy technologies, or ones that wish to encourage environmentally benign technologies, or individuals who would like to take part in encouraging the development of renewable energy in Montana are encouraged to join us in this important effort.

Recent Accomplishments

- ❖ *Newsletter on line* <http://www.montanagreenpower.com/mrea>. See this for current membership lists and upcoming events.
- ❖ *Participation in Events:* Sustainable Energy Fair in Livingston; Solar Home Tours, Earth Day, NCAT 30th Anniversary Celebration.
- ❖ *Montana Renewable Energy Factsheets* distributed by the thousands at home shows, energy fairs, and equipment dealerships.
- ❖ *Advocacy for Montana renewable energy:* Quarterly meetings provided forum for current issues at the state and national level.

Events

- ❖ Renewable Energy Awards
- ❖ More events such as the Greening of Yellowstone Conference.
- ❖ Updates on Legislature, green tags, tax incentives, rebates, government loans, USBC, wind data, wind farms, million solar roofs, net-metering, and many more timely topics.
- ❖ Expanding Membership. Current membership includes representatives of equipment dealers, installers, designers, state and federal government, utilities, individuals, environmental groups, and...
